

We develop products and services that make many things easier. And you?

UTA Edenred ensures **professional mobility throughout Europe**. It is important to us that you want to make a difference! We are looking for a full-time position as of now:

DevOps Engineer (all genders)

Your responsibilities:

- You set up and maintain the environments where applications are deployed and run – from configuring servers, databases, and cloud services to managing monitoring and log management tools
- You ensure that the infrastructure remains highly available, scalable, and secure while continuously improving performance and documentation
- You take care of testing and deployment processes, making sure everything runs smoothly and efficiently
- You lead team training sessions to strengthen knowledge of tools, automation, and best practices
- With your strong interpersonal and intercultural skills, you apply effective project management techniques to drive collaboration and results

Your profile:

- You hold a Bachelor's degree in Computer Science, Electronics, Mathematics (or equivalent)
- Several years of hands-on experience in building Cloud environments have shaped your deep understanding
- You bring strong expertise in cloud technologies, with a strong focus on Microsoft Azure (Databricks, Unity Catalog)
- Hands-on experience with SQL and Python complements your cloud expertise
- Communication skills in English make it easy for you to collaborate effectively across teams and regions
