# UTA Edenred Drive: The new mobility app from UTA Edenred

- **Smartphone app combines UTA EasyFuel® digital fuel card, UTA Stationsfinder and other functionality into a single, easy-to-use package**
- **The UTA Edenred digital fuelling network now features 4,000 stations in eight countries**
- **UTA CardLock provides enhanced security for fuel transactions**

**Kleinostheim, Germany** – [UTA Edenred](#), a leading mobility service provider in Europe and an Edenred company, has launched UTA Edenred Drive – a new smartphone app that combines the functionality of formerly separate UTA Edenred apps and digital services into one practical application.

Available for free and in nine languages in the iOS and Android app stores, UTA Edenred Drive incorporates UTA EasyFuel® digital fuel card functionality as well as UTA Stationsfinder, which enables users to search for fuel stations, fuel types, prices and services in UTA's acceptance network.

The new app features two-factor authentication with a security PIN and optional biometric security for additional protection. In addition, if a user has forgotten their UTA fuel card PIN, they can retrieve it via the app.

## **UTA EasyFuel: UTA Edenred's digital fuel card**

UTA EasyFuel enables users to process fuel transactions quickly and securely at the pump with their smartphone. The digital fuel card reduces the risk of illegal tapping of card data and eliminates the need to queue at the cash desk.

UTA EasyFuel can be used at over 4,000 fuel stations in eight countries, including Germany, Austria, Belgium and Italy. Affiliated brands include HEM/Tamoil, Westfalen, Q1, AVIA, Classic, Hoyer, Tamoil, Maes and PMO – with many more to follow as UTA Edenred expands its digital fuelling network.

## **UTA CardLock for increased fuel card security**

The UTA CardLock security feature integrated into the UTA Edenred Drive app provides even more protection against card misuse. With it, a UTA Card can be put into safe mode and blocked for use. To carry out fuel transactions, the card can be activated for a 60-minute time window. After that, it is automatically reset to safe mode. Activation can be performed by a driver via the app or by a fleet manager via the UTA Service Center.

**Pierre Jalady, General Manager Edenred Mobility EMEA and CEO of UTA Edenred, says:** "UTA Edenred Drive is an important addition to our digital service offering. It combines functions that make the everyday life for drivers easier and, with UTA CardLock, provides effective protection against card misuse."

### Additional features in the pipeline

In the coming months, UTA Edenred plans to incorporate more features to the UTA Edenred Drive app. For example, the navigation and filter options will be expanded, a 24-hour breakdown assistance hotline will be added, and UTA eCharge® functionality will enable charging points to be located while on the move.

### UTA Edenred Drive – Practical not only for UTA customers

UTA Edenred's mobility app offers the most utility when used in conjunction with a UTA fuel card. However, even without a UTA Card or UTA customer account, the free app can simplify life for road users. UTA Edenred Drive's comprehensive search function, for example, helps users find the nearest fuel station on their route, as well as specific fuel types, prices, opening hours and specialist services such as dedicated truck parking and vehicle cleaning in UTA Edenred's European network.
