

UTA eCharge® Charging Tariff

Public charging in Germany	
UTA unified tariff	
Charging session - AC (€/kWh)	0,50
Charging session - DC (€/kWh)	0,65
Charging session - HPO / High-Price Operator (€/kWh) <small>Current High-Price Operator (DC): IONITY, Mer</small>	0,75
Blocking fee (€/min): <small>AC: ≥ 210 minutes DC: ≥ 60 minutes</small>	0,08
Public charging outside Germany	
Session price	Operator tariff (as displayed in the ChargePoint app) plus UTA Service Fee

The use of all other services in connection with your UTA eCard is governed by the separate tariff list for your contract. Your UTA eCard is subject to the tariff list valid for your contractual relationship, which can be viewed in the UTA Service Center. UTA Service Fee can be found in the service surcharge list. Otherwise, agreed conditions apply.

Invoicing of charges

- ▶ The duration of the charging process is calculated based on the time the vehicle is connected to the charging station and the time the connection is disconnected. It is the basis for the blocking fee, which is intended to serve the fair use of charging infrastructure.
- ▶ Billing by operator rate may include varying charges based on, for example, kWh, per minute or part thereof, per charge, or a combination of rate components. Please refer to your ChargePoint mobile app for the operator tariff for the respective station before starting the charging process.
- ▶ Charging stations offering free charging are also free for UTA customers.

Unless otherwise stated, all services purchased shall be invoiced in euros plus the statutory value-added tax and on the basis of the [General Terms and Conditions](#) of UNION TANK Eckstein GmbH & Co. KG.

The reference value of the percentage service surcharges is transacted turnover plus legal value added tax. The calculation of time-dependent services is carried out to the minute and is shown accordingly in decimal form on the invoice.

As of: 15.01.2024. All prices and VAT subject to change. Mistakes reserved..
